LAWN SEED

HORMO-SUN LAWN SEED

Our well known mixture of Red Top-White Clover-Blue Grass (formerly called Stoecker's Red, White and Blue) to which we have added Root Forming Hormone Powder. Our many years of study and experience with lawns has proven that this Red, White and Blue Mixture will give satisfaction except in dense shade. With this improved seed you will have faster germination, deeper stronger root growth, and better utilization of fertilizer. All of which means a thicker, heavier turf. And the denser the growth of grass, the less chance the weeds have of developing. Use non-burning Milorganite Fertilizer with this seed and produce a lawn that is smooth, even and thick. All the grasses in this mixture are fine-bladed and deep-rooting. Sow 5 pounds per 1000 square feet for new lawns, 3 pounds for re-seeding. Hormosun: ½ lb., 30c; 1 lb., 57c; 3 lbs., \$1.65; 5 lbs., \$2.65; 10 lbs., \$5.10; 25 lbs., \$12.50; 50 lbs., \$24.50; 100 lbs., \$47.00.

HORMO-SHADE LAWN SEED

This is our blend of Shady Spot Lawn Seed to which we have added the same Root Forming Hormone Powder mentioned above in Hormo-Sun. We recommend Hormo-Shade for seeding areas that are shaded by large trees, receiving less than half of the day's sunshine. Sow 5 pounds per 1000 square feet for new lawns, 3 pounds for re-seeding. Hormo-Shade ½ lb., 40c; 1 lb., 73c; 3 lbs., \$2.15; 5 lbs., \$3.50; 10 lbs., \$6.80; 25 lbs., \$16.50; 50 lbs., \$32.

FOR GRUBS IN LAWNS

If dead patches appear in your lawn, and the sod loosens and rolls up when raked, examine the soil for the presence of white grubs, about an inch long. These grubs devour the roots of the sod causing thin or bare spots, and during the summer crabgrass usually appears and fills in these spots. To control the grubs apply Arsenate of Lead, 2 pounds per 100 square feet, (10x10 ft.). An application of Arsenate of Lead on lawns usually controls grubs for from 3 to 5 years.

MILORGANITE FERTILIZER

Golf Clubs use more Milorganite than any other fertilizer because long experience has proven to them that it is an ideal turf fertilizer. Milorganite is granular in form, not dusty. It is easy to apply, weed-free, and will not burn. Apply 3 to 5 pounds per 100 square feet. 25 lbs. covers 20x20 ft., \$1.10; 50 lbs., \$1.75; 100 lbs., \$2.85.
